◆ The "BUDGET" amounts are what you expect to earn or spend. If you're not sure, track what you make and spend for one month and then the next month, you will have a better idea of what to set for budget.

◆ Set a budget and try and stick to it. Earn what you plan to earn, spend what you plan to spend, and save what you plan to save.

 ◆ Each month, review your budget planner for areas you could spend less or save more. Make adjustments as you go.

◆ Look for coupon codes, discounts and sales. Be a smart shopper. Use your student ID at locations that offer student discounts.
